* The driver is suitable for connecting resistor current-limiting LED fixture (e.g. LED strip). The instantaneous surge current will be several times increased if connecting built-in constant current IC current-limiting LED fixtures, the driver will activate the overloaded protection (hiccups flickering). When you order, please remark controlling the constant current LED fixture (e.g. underground light, LED wall washer, constant current LED strip, etc.), then we can prepare the special programs.

Wiring diagram

DALI DT8 Connection

DIM: 0-100% brightness adjustment.
CCT: 2500-6000K color temperature adjustment.

Push DIM/CCT Connection

DIM: 0-100% brightness adjustment.
CCT: 2500-6000K
Color temperature adjustment.

* Dimming interface priority: First DALI DT8, next Push DIM/CCT.

* Adopting constant power program design, it keeps the same brightness in color temperature dimming, twice the rated power load can be connected.
75W driver, 75W X 2CH load can be connected, the total power of the 2 channels will be kept in 75W.

Push DIM/CCT

Reset switch

DIM

- On/off control: Short press.
- Stepless dimming: Long press.
- With every other long press, the brightness goes to the opposite direction.
- Dimming memory: Brightness will be the same as previously adjusted when turning off and on again.

CCT

- Color temperature adjustment: Long press.
- With every other long press, the color temperature level goes to the opposite direction.
- Color temperature memory: Color temperature will be the same as previously adjusted when turning off and on again.
