

Intelligent LED Driver (Constant Current)

- Housing made from SAMSUNG/COVESTRO's V0 flame retardant
- Ultra small, thin and lightweight, screwless end cap.
- Change the output current, dimming mode and other parameters via
- Adjustable output current with 1mA step.
- Automatically recognize 0-10V and 1-10V input signal.
- Ultra-low consumption of 0-10V ports < 0.05mA.
- $\bullet\,$ Soft-on and fade-in dimming function enhances your visual comfort.
- T-PWMTM super deep dimming technology, 0.01% dimming depth.
- The whole dimming process is flicker-free with high frequency exemption level.
- Comply with the EU's ErP Directive, networked standby<0.5W.
- $\bullet\,$ When there is no load, the output will be 0V to prevent damage to LEDs due to poor contact.
- $\bullet\,$ Overheat, over voltage, overload, short circuit protection and
- Suitable for Class I / II / III indoor light fixtures.
- Normal service life can reach 100,000 hours.
- 5-year warranty (Rubycon capacitor).

4 in 1 dimming 0-10V 1-10V 10V PWM

Flicker Free IEEE 1789

Dimmable: 1:10000

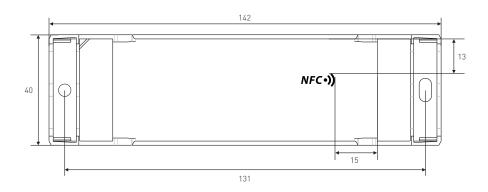

Technical Specs

Model		SE-40-3	800-1050-W1A	SE-30-200-800-W1A						
	Output Type			[N						
	Dimming Interface	Constant current 0-10V (1-10V, 10V PWM, RX)								
Features	Output Feature									
	Protection Grade	Isolation IP20								
	Insulation Grade									
	Output Voltage	Class II (Suitable for class I/ II /III light fixtures) 9-42Vdc								
	Maximum output voltage	<55Vdc								
OUTPUT	Output Current Range	300-1050mA 200-800mA								
	Output Power Range	2.7W-40W 1.8W-30W								
	Dimming Range	2.7W-40W 1.8W-30W 0~100%, down to 0.01%								
	LF Current Ripple			dimmina statal						
	Current Accuracy		<3%[Maximum current for non dimming state] ±5%							
	PWM Frequency									
	DC Voltage Range	€3600Hz								
	AC Voltage Range		120-250Vdc							
		100-240Vac								
	EoFi Input Voltage	100% 115Vcc/220Vcc								
		115Vac/230Vac								
	Frequency Input Current	50/60Hz								
	Power Factor									
INPUT	THD	PF>0.95/115Vac (at full load), PF>0.9C/230Vac (at full load)								
INPUT	Efficiency (Typ.)	THD≼10%/230Vac, at full load								
		88% 87%								
	Inrush Current	Cold start 25A(Test twidth=130us tested under 50% peak)/230Vac								
	Anti Surge	L-N: 2K								
	Leakage Current	Max. 0.5mA								
	Working Temperature	ta: -20 ~ 45°C tc: 90°C								
	Working Humidity	20 ~ 95%RH, non-condensing								
ENVIRONMENT	Storage Temperature/Humidity	-40 ~ 80°C/10~95%RH								
	Temperature Coefficient	±0.03%/°C(0-50°C)								
	Vibration	10~500Hz, 2G 12min/1cycle, 72 min for X, Y and Z axes respectively

Application Diagram of Protective Cover

 Put the head of a screwdriver on the side of the housing to pry up both the protective cover and wire fixing board. Then remove the wire fixing board and connect to the wires as wiring diagram shows.

2. Install the wire fixing board and press it down. Then snap on the protective cover while pressing the wire fixing board with a small flat-head screwdriver

Installation Precautions

Please do not stack the products. The distance between two products should be \geq 15cm so as not to affect heat dissipation and the lifespan of the products.

Note: The installation should be in line with the environmental operating temperature of the product. Do not install it inside the lamp to avoid exceeding the environmental operating temperature of the product, which may affect the product's lifespan.

Please not place the products on LED drivers. The distance between the product and the driver should be \geq 15cm so as not to affect heat dissipation and shorten the lifespan of the products.

Do not fix the product screws tightly against the wooden board. Instead, add a washer with a thickness of \geq 7mm under the fixing screws. Leaving some gaps can effectively dissipate heat, preventing any impact on the product's heat dissipation performance and service life.

Use the NFC Lighting APP

Scan the QR code below with your mobile phone and follow the prompts to complete the APP installation (According to performance requirements, you need to use a NFC-capable Android phone, or an iphone 8 and later that are compatible with iOS 13 or higher).

* Before you begin setting the parameters of the driver, please make sure the driver is powered off.

Read/Write the LED driver

Use your NFC-capable phone to read LED driver data, then edit the parameters and they can be directly written to the driver.

1. Read the LED driver

On the APP home page, click [Read/Write LED driver], then keep the programmer's sensing area close to the NFC logo of the driver to read the driver parameters.

2. Edit the parameters

Click 【Parameter settings】 to edit the advanced parameters, like output current, dimming mode, low power mode, etc.

3. Write to the driver

After completing the parameter settings, click [Write] in the upper right corner, and keep the programmer's sensing area close to the NFC logo of the driver, so the parameters can be written to the driver.

Modulation Area Diagram

Flicker Test Sheet

Marks in the right chart were tested results of different current ranges.

The output frequeny is 0Hz in 100% brightness and its corresponding modulation is 0%, which could not be shown in the right chart.

Packaging Specifications

Model	SE-40-300-1050-W1A	SE-30-200-800-W1A
Carton Dimensions	320×275×106mm(L×W×H)	320×275×106mm(L×W×H)
Quantity	20 PCS/Layer; 2 Layers/Carton; 40 PCS/Carton	20 PCS/Layer; 2 Layers/Carton; 40 PCS/Carton
Weight	0.17 kg/PC; 7.6 kg±5%/Carton	0.15 kg/PC; 6.8 kg±5%/Carton

Transportation and Storage

1. Transportation

Products can be shipped via vehicles, boats and planes.

During transportation, products should be protected from rain and sun. Please avoid severe shock and vibration during the loading and unloading process.

2. Storage

The storage conditions should comply with the Class I Environmental Standards. The products that have been stored for more than six months are recommended to be re-inspected and can be used only after they have been qualified.

Attentions

- Products shall be installed by qualified professionals.
- LTECH products are and not lightningproof non-waterproof (special models excepted). Please avoid the sun and rain. When installed outdoors, please ensure they are mounted in a water proof enclosure or in an area equipped with lightning protection devices.
- Good heat dissipation will prolong the working life of products. Please ensure good ventilation.
- Please check if the working voltage used complies with the parameter requirements of products
- The diameter of wire used must be able to load the light fixtures you connect and ensure the firm wiring.
- Before you power on products, please make sure all the wiring is correct in case of incorrect connection that causes damage to light fixtures.
- If a fault occurs, please do not attempt to fix products by yourself. If you have any question, please contact your suppliers.
- * This manual is subject to changes without further notice. Product functions depend on the goods. Please feel free to contact our official distributors if you have any question

Warranty Agreement

- Warranty periods from the date of delivery: 5 years.
- $\bullet \quad \text{Free repair or replacement services for quality problems are provided within warranty periods}.$

Warranty exclusions below:

- Beyond warranty periods.
- Any artificial damage caused by high voltage, overload, or improper operations.
- Products with severe physical damage.
- Damage caused by natural disasters and force majeure.
- Warranty labels and barcodes have been damaged.
- No any contract signed by LTECH.
- 1. Repair or replacement provided is the only remedy for customers. LTECH is not liable for any incidental or consequential damage unless it is within the law.
- $2.\,\mathsf{LTECH}\,\mathsf{has}\,\mathsf{the}\,\mathsf{right}\,\mathsf{to}\,\mathsf{amend}\,\mathsf{or}\,\mathsf{adjust}\,\mathsf{the}\,\mathsf{terms}\,\mathsf{of}\,\mathsf{this}\,\mathsf{warranty}, \mathsf{and}\,\mathsf{release}\,\mathsf{in}\,\mathsf{written}\,\mathsf{form}\,\mathsf{shall}\,\mathsf{prevail}.$
